ABOUT ME

I am a Creative and highly Imaginative individual who is highly enthused with design, aesthetics, problem solving and programming. I like to involve myself with anything that encompasses problem solving and enhancing aesthetics of any design simultaneously.

I have been a front-end developer for over three years now and it I love it because it is one of the rare fields of computing that merges problem solving and aesthetics into a single common discipline.

EXPERIENCE

2016-2018(FRONT-END DESIGN)

-Developing front-end designs using HTML for creating basic web structures and CSS for styling all html elements and tags.

-Creating responsive websites which functions on both desktop and mobile devices.

-Utilized Javascript to build complex UI and UX Designs

-Worked and utilized CSS frameworks like SCSS and Bootstrap to speed up development time and meet product deadlines.

2017-2022(UI & UX DESIGN)

-Mastered design and illustration software like Photoshop, illustrator to creating wireframes and assets for all UI and UX designs.

-Creating UX, UI and designs in Figma and Adobe XD(Mostly Figma).

-Creating and implementing prototypes for all User Experiences and User Interfaces for a comprehensive experience for clients before web development commences.

2020-2022(UTILIZING FRONT-END FRAMEWORKS)

-Studied and used React to build reuseable components to speed up the web development production pipeline.

-Used React to build fast, easily accessible and bug free web-sites.

-Used React to utilize, make fetch requests and connect to back-end services for the web project for clients.

-Used tailwind to build fast and extremlely responsive websites to save time in the styling (CSS)of the web development process.

-Creating and building Progressive Web Apps.

PROJECTS

-Created User Interfaces and User Experience Deisgns for Clients.

-Built and deployed an E-Commerce website.

-Built and deployed static websites.

-Built, deployed and egineered progressive web apps.
